Grant County, IN Highlights

Introduction

The first edition of the *County Highlights* was published in 1993. Lillian Miles, then Labor Market Analyst for the Gary Primary Metropolitan Statistical Area, originated the idea for this descriptive area publication.

Highlights are now a web publication and, as a result, the data can be updated throughout the year, not just on an annual basis. These Highlights are available in easy-to-use web format but are also printable and e-mailable and provide a snapshot of critical population and workforce statistics for each of Indiana's 92 counties, 11 Economic Growth Regions, and the State of Indiana.

Each *Highlights* includes an overview of the demographics and workforce of an area, from its population to the size of its labor force and the industry mix of jobs and wages.

Don't hesitate to contact your regional analyst, Sharon Ringenberg (260-469-4217) if you need further information about your area.

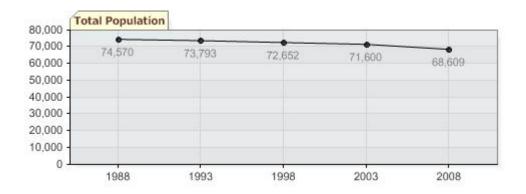

Location

Grant County is located in north east Indiana. The county is bordered on the south by Madison County and Delaware County. Blackford County and Wells County are adjacent to Grant County on the east, Huntington County and Wabash County to the north, and Howard County and Miami County to the west. Grant County is one of the eleven counties located in the area designated by the Indiana Department of Workforce Development as Indiana Economic Growth Region 3.

Population

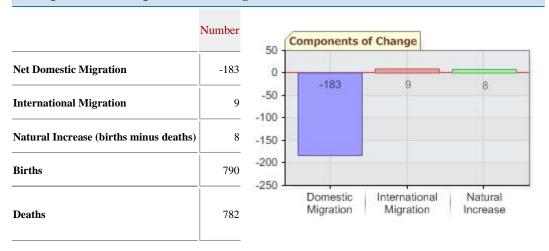

A region's economy thrives or dives because of the people who choose to live there. That choice may occur by being born there and desiring to stay, or a more deliberate one of choosing to relocate from somewhere else. Monitoring change in the size and movement of population is an important barometer of well-being. Some of us monitor these changes as an insect might gauge the shifting sands while most don't pay much attention. But the barometer is a good metaphor for population change since it can presage more notable events, such as lackluster business attraction due to lack of workers.

Education

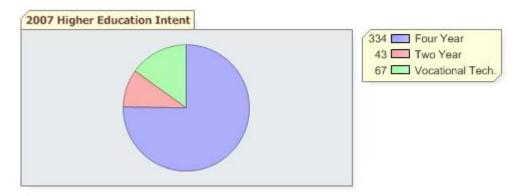

The level of education of our workforce is a critical factor for economic and community development. It often provides insight into the skill levels of a local area. The metrics provided here focus on the attainment of degrees and high school graduates' higher education intent. The type of work (occupations) residents perform can also assist in understanding skill levels.

Educational Attainment					
	1970	1980	1990	2000	
Total Population 25 and Older	44,081	46,199	47,541	47,408	
Less than 9th Grade	11,425	7,912	4,011	2,466	
9th to 12th, No Diploma	10,327	9,338	9,416	7,405	
High School Graduate (incl. equiv.)	15,843	19,492	19,519	19,858	
Some College, No Degree			7,208	8,607

Commuting

In Indiana, most workers commute to a job, either within their home county or beyond. Patterns of commuting are significant in showing the labor supply. The county *labor force* represents workers who reside in the county no matter where they work. Two types of commuting patterns are provided here - the Census 2000 *benchmark* and the annual data tabulated from state income tax returns that can help provide a more current view.

Commuting Data, 2007	
	Number
Number of tax filers who live in county and work	44,057
Number of tax filers who work in the county	44,226
Number of tax filers who live in county and work in county	39,041
Number of tax filers who live out of the county and work in county	5,185
